Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of figures 1a-1e in the reply filed on 12/22/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 2, 3, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claims 2, 3, and 9 recite the limitation "said connecting means" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dimitriu (U.S. 5,957,931).

Art Unit: 3734

Dimitriu discloses substantially as claimed in figures 1, 2, and 4-7, a suction cup (12) having a vacuum tube (22) and a connector piece (50); a towing means comprises a handle (at proximal end of 42), a connecting part (at 42), and a connector (44); a locking means (connection between connector (44) and connector piece (50)(see col. 5, lines 6-21)); said connector piece (50) and connector (44) are being movably fixable to each other (as shown in figures 5 and 6); wherein said connector piece (50) is an integrated part of the sphere of the suction cup (12); furthermore, wherein said connector piece (50) appears to have slot, recess, and spherical inner surface (see figures 1, 2, 4, 5, and 6).

Allowable Subject Matter

7. Claims 11, 13-15, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. King (U.S. 4,730,617) and Dimitriu et al. (U.S. 6,361,542) disclose an obstetric vacuum extractor having suction cup with vacuum tube and connecting means between handle and suction cup.
